

OS&Y Gauge Valves

Root isolation valves with outside screw and yoke, bolted bonnet construction for pressures up to 6,000 psi (414 barg)

General Application

M5K series gauge valves are designed for use with gauge mountings and other pressure instruments in refineries and chemical plants. The M5YK can also be used as a root/primary isolation valve in differential pressure transmitter installations.

TECHNICAL DATA

Materials

CS, 316 SS and other exotic materials

Seats:

Metal, soft, Monel®

Connections:

Inlet: ½", ¾", 1" NPT or welded

Outlet: ½" NPT

Pressure (max):

6,000 psig (414 barg)

Temperature (min-max):

-70°F to 1000°F

(-57°C to 538°C)

Features

- True 4-bolt bonnet design provides easy access to the packing gland. Stem threads are completely isolated from the process.
- Protective stem bellows and cap protects against atmospheric contamination, increases valve life and helps contain stem lubricant, reducing thread galling.
- Compact design minimizes space requirements. Lower valve weight improves connection strength and reduces induced bending moments.
- Multi-port outlet means fewer fittings, fewer leak points and reduced installation cost.
- Standard CF8M investment cast yoke resists corrosion, increasing valve life.
- Single-piece yoke design eliminates stem binding.
- Widely compatible graphite or PTFE flange gasket ring minimizes bonnet-to-body gasket deterioration.
- Free-swivelling ball end stem design (M5K, M5YK) or non-rotating plug design (M5AK) provide bubble-tight valve closure without metal seat galling and low seating torque.
- Integral hard back seat (M5K, M5YK) protects against stem blowout and provides alternate sealing for longer packing life.
- Optional replaceable soft seat design (M5K, M5AK) provides bubble-tight seat with a fully roddable, bi-directional flow. M5AK metal or soft roddable seat.

M5K/M5AK/M5YK SERIES

OS&Y Gauge Valves

Product Overview

M5K Gauge valve

The M5K gauge valve is a multi-ported root/primary instrument isolation valve, designed for use with gauge mountings and other pressure instruments in refineries and chemical plants. The M5K facilitates installation of multiple measurement devices without additional penetrations of the main piping.

The M5K is available in integral metal seat globe pattern design or various replaceable, roddable soft seats. ($\frac{1}{4}$ " [6.4 mm] diameter orifice).

M5AK Gauge Valve

The M5AK gauge valve is a multi-ported root/primary instrument isolation valve, designed for use with gauge mounting and other instrument ties in refineries and chemical plants. Additional penetrations of the main piping are not required.

The M5AK is available with a variety of replaceable, roddable, metal or soft seats, with $\frac{3}{8}$ " [9.5 mm] diameter orifice. The unique metal seat design offers bubble-tight shutoff with straight-through flow characteristics.

M5YK Gauge Valve

The M5YK gauge valve is a versatile, dual outlet valve for use in gauge mounting or as root/primary isolation valve in differential pressure transmitter installations. In-line construction of body and OS&Y bonnet allows installation and replacement of valves in orifice taps without removal of bonnet assembly.

The valve is designed for safety, service and economy. The long-necked inlet provides room for insulation and the dual $\frac{1}{2}$ " NPT outlet ports provide an extra outlet for bleeder or sampling valves.

The M5YK is standard with $\frac{1}{4}$ " [6.4 mm] integral seat. Stem ball of selected metals to match process requirements.

OS&Y Gauge Valves

M5K - Bonnet Assembly

M5K metal seat dimensions, inches [mm]

NOTES

1. Approximate valve weight:
 Standard 3.5 lb [1.6 kg]
 Long 4.0 lb [1.8 kg]
 $\frac{3}{16}$ -inch [4.8 mm] diameter orifice
 Valve Cv 0.52 maximum
2. For Hastelloy® and SG3 call factory for dimensions and weights.

M5K soft seat dimensions, inches [mm]

NOTES

1. Approximate valve weight:
 Standard 3.5 lb [1.6 kg]
 Long 4.0 lb [1.8 kg]
 $\frac{1}{4}$ -inch [6.4 mm] diameter orifice
 Valve Cv 1.4 maximum
2. For Hastelloy® and SG3 call factory for dimensions and weights.

NOTES

- CS is zinc TCP plated to prevent corrosion (except male plain end is black oxide coated).
- SG (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions ≤ 50 mg/l (ppm)) and NACE MR0103-2005.
- PCTFE (Polychlorotrifluoroethylene) is the exact equivalent of Kel-F[®].
- SG3 (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions > 50 mg/l (ppm)). If accessories are added, consult factory for materials.
- Temperature (min.) -70°F (-57°C) for all metal seated valves, PTFE, -40°F (-40°C) for Delrin soft seats.
