

Penberthy Assembly Program

Local Gauge Assembly Delivers Results that Matter to You

Choosing the right solutions for your site includes much more than products and technologies themselves. Responsiveness, support, and quality service elevate your operations to help you maximize results. Caltrol is committed to being a trusted, comprehensive partner in your success. For you that means an innovative, tailored approach and local service that is unparalleled. Our Penberthy Assembly Program offers these benefits and more.

Why Choose Caltrol's Penberthy Assembly Program?

Caltrol is your premier option for Penberthy Assembly in the Southwest US region. Our Penberthy Assembly Program service areas include Arizona, California, Hawaii and Nevada. Our team delivers assembled, tested and ready-to-install level gauges in approximately one week. We maintain local parts and inventory, so that our highly trained technicians can begin your assembly immediately. That means faster production and delivery times, helping you and your team receive what they need, when they need it. Combining Emerson's leading level solutions with our local assembly program improves reliability, increases safety, and boosts your operational performance.

Time Savings: Expedited Response

When you choose Caltrol's local Penberthy Assembly program, you will benefit from significantly reduced turnaround times. The availability of local technicians moves assembly time from weeks to days. This means you have the products you need faster. With service centers strategically located throughout the Southwest, Caltrol is locally available, and we can easily provide you the services and products you need.

Cost Savings: Efficient and Affordable Solutions

With faster turnaround and local delivery, you will realize a cost savings. The gauges you need can be available quickly, improving your operations and eliminating the need for your team to work around cloudy or broken gauges.

Vetted Program: Excellent Quality and Technical Expertise

As an Emerson Impact Partner, Caltrol's technicians are trained to assemble and repair gauges to factory specifications. The same high quality you expect from Emerson is now available to you in your region. Your Caltrol team can also complete level gauge surveys by walking your site to identify needs and review existing equipment regardless of the current installed brand.

Penberthy Assembly Program

Penberthy Level Solutions

Emerson offers various liquid level solutions, including products that meet the ASME requirements for direct or remote boiler level indication. Penberthy liquid level gauges are used in petrochemical processing, refining, pharmaceutical and other industries. Applications include compressors, water treatment, storage tanks and oil/water separators. Emerson products provide reliable and accurate fluid monitoring. Additionally, a full suite of accessories ensures dependable level indication across various environments, such as those that require insulation blankets, remote monitoring and explosion-proof illuminators.
